1. INTRODUCTION

Lord prof PhD PhD Momtchil Dobrev-Halachev developed 2003 " Theory and practice of causing / generating crises, formulas and laws, patterns, caused by representatives of "Financially banking resource-based technological mafia-driven materialism" and the deep mafia, with this practical theory, laws formulas Prince Lord Prof. Momtchil Dobrev predicted the World Financial Crisis 2008 and any economic, financial, currency, refugee, crises, as well as color revolutions, yellow revolutions and others. Prince Lord Prof. Momtchil Dobrev created and 2003 "Theory and practice of the Mafiotismus" and 2001 " Theory of the mafia".

In the year 2010 Lord Prof. Momtchil Dobrev developed the "Theory of Mafiotismus" as a new state level based on private and personal interests of the prime-minister, ministers, government.. Based on this "Theory of Mafiotismus" Lord Prof. Momtchil Dobrev developed 2010 the "Financially banking resource-based technological mafia-driven materialism" as a based principle materialismus since more than 17 century.

In the year 2001 Lord Prof. Momtchil DObrev developed the Theory of the mafia and Theory of

corruption. All the two theories have been developed by analyzing the mafia and the corruption all over the world.

1.1 Introduce the Problem

Real through Theory of inducing and generating crises prince lord prof. Momchil Dobrev proves how crises are created, how crises are provoked, how crises are generated in favor of a segment of the global elite, whose sole goal is profits and the enslavement and enslavement of peoples, states, and nations.

The problem of the emergence and cause of the global financial crisis in 2008 is very important. The resolve of the causes of the financial crisis in 2008 is vital for our entire civilization. The research, which is based on Momchil Dobrev Dobrev's Theory of Crisis Generation, which gives a different view of the causes and consequences of the emergence of the global financial crisis in 2008. Here is the view of Momchil Dobrev Dobrev that the basis for the cause of the global financial crisis in 2008. has been the available and free money since 2003. until 2008. which were as profits from investments in arms and the financing of the Iraq war in 2003. investment in weapons, service, war, war support in Iraq 2000 3. The conclusions of Momchil Dobrev Dobrev are relevant here, based on his theories of

generating crises, which prove that there is a clear connection and the track record of the profits from the arms trade and the organization and maintenance and support of the Iraq war in 2003. Here, it is important to conclude that the profit rate in the arms business and hence the generalized flaw in the whole process of preparing and implementing the war in Iraq are important conclusions that explain the causes of the global financial crisis in 2008.

Practical data on manufactured and sold arms for the Iraq war 2003 Maintaining the war, serving the war in Iraq in 2003. provide good evidence for this hypothesis, which is a treatise on Momchil Dobrev Dobrev's Theory of Helicopter Crisis, that free money from profits in arms and business for the Iraq war in 2003. and which phohotest has good and practical evidence.

1.2. The importance of revealing the real and real causes of the global financial crisis in 2008. is of great importance for our entire civilization. This is important in order to be able to anticipate and track such processes and take real measures to prevent such crises.

Preventing, tracking and preventing such crevices is important for the stability of financial, economic, social, public structures, the stability of individual states, entire continents, economic alliances.

1.3. To solve the problem of the real causes of the global financial crisis, according to Momchil Dobrev Dobrev, it is necessary to analyze the volume of arms sales, auxiliary equipment, money for servicing the troops, and the whole process of financing the war in Iraq in 2003. , what profits are made by the whole process and from there as a result of the available free money in the global financial markets. What is important for solving the problem of accounting for realized profits is also what is the profit rate in the trade and sale of arms and equipment from which to deduce the available free money from this process. All this analysis proves to one hundred percent the hypothesis of Momchil Dobrev Dobrev, which hypothesis is based on the theory developed by Momchil Dobrev Dobrev - Theory of Crisis Generation.

1.4. The thesis of Lord Prof. Dr. Momchil Dobrev is that the real causes of the financial crisis in 2008. is the accumulated money from the profit from the sale of weapons and equipment and the financing of the war in Iraq. This thesis rests on the conclusions of Lord Prof. Dr. Momchil Dobrev based on the amount of money spent on financing the war in Iraq and the rate of profit from the sale of weapons, ammunition, equipment, war maintenance - clothing, equipment , foods.

1.5. The conclusions of Lord Prof. Dr. Momchil Dobrev rely on his experience and knowledge of the norm of profit in the trade of weapons, ammunition, food, equipment and clothing and military support in one war.

So far no one in the world has looked at the dependence of free money generated and profits on profits and the investment of these free money in construction and such derivatives and instruments.

An attack of war imposes and requires that it be funded, both with creatures and with production. The process includes banks, financial institutions, arms business companies, the military industrial complex, and not the political mafia.

As a result of each war, there is an economic crisis, a production crisis, an industrial crisis, a social crisis, a social crisis. These crises must be funded, where the aggressor is usually replaced by the aggressor, who owes money for years to the war and his presence, redistributes wealth, draws mostly from profits.

- Profits the aggressor derives in all areas of development of a country or region.

The macroeconomics does not take into account - what is the profit rate. Whether this profit rate is invested back and in what size and share, and more importantly, in what industry.

All revenues and savings are treated in a variety of industries one by one - THAT DOES THE WEAK.

- Moreover, there are schemes to lawfully conceal profits - through so-called offshore companies.
- In the different branches of the economy, they have different rates of profit.
- So in the military production sector, the profit rate ranges from 30% to 70%.
- It's the lucky winner with the highest profit rate.
- The light industry is about 5-10%.
- Food industry 15 - 25 percent.
- But also as a relative volume and as a total volume sales of weapons and ammunition are the largest.
- Here are the wrong conclusions of the macroeconomics about a given state of the planet's economy.

- Here are the wrong conclusions about the consequences.
- A distinction must be made between which sectors are state-owned and which industries dominate private companies.
- The Pentagon's spending on wars in Iraq and Afghanistan is \$ 1.6 trillion. and This means that the profit rate is from 30 to 70 percent for different weapons, equipment and ...
- Let's make things simple - that's 800 billion dollars of sour money for investment.
- Where - in the closest and fastest returns in the industries.
- Cocaine profit rate where is it invested? . In construction. Money laundering of drugs and weapons goes through construction.
- Here the reversibility terms are shorter and the renown is the fastest - 18-22 MONTHS. The profit rate is from 300 to higher.

4.3. The balloon of the free availability of profits from the sale of weapon based on the high norm of profits

THE BALON OF FREE AVAILABILITY OF PROFITS - MONEY FROM THE SALE OF WEAPON THE IDENTIFIED WAR IN IRAQ - INVESTED IN THE CONSTRUCTION WHERE THE RULE OF PROFIT IS HEAVY AND IT FOR 1.5 - 2 YEARS.

The war in Iraq provides an investment of \$ 411 million every day

The cost of the war in Iraq is actually between \$ 3 trillion and \$ 4.4 trillion.

The war began on March 20, 2003, when England and the United States attacked by air, land and sea, backed by Australia, Denmark, Poland, Spain

On March 6, 2003, inspectors published a report stating that they believe that Iraq, with its emerging economy and level of development, is in a position to develop or support a program to develop weapons of mass destruction.

On the other hand, the United States has several times suggested that al-Qaeda has terrorist training camps on Iraqi territory and that Saddam Hussein himself is financially helping her. Al-Qaeda's Rod-Osama bin Laden firmly denies that,

Every second of a war in IRAQ costs \$ 5,000,

In 2001, George Bush, George. This year, the financial sector becomes more powerful, more profitable and more concentrated. There are five investment banks, two financial conglomerates, three re-rating agencies and three insurance companies.

Businesses Build for Trillion US Dollars From Mortgages Mortgages are initially normally structured.

Under the new scheme, when lending a property, lenders sell the mortgages of the envy banks, Investment Bankers combine thousands of mortgages and loans and create complex derivatives called structured bond issues.

Investment banks then sell SEE to investors. Thus, when the borrower pays the mortgage, the money goes not to the lender but to the investors from all over the world.

In 2001, George Bush, a junior, comes to power in the United States, and this year, the financial sector has become much more profitable and more successful. At the heart of this prosperity are five investment banks, two financial consortia, three rating agencies, and three insurance companies.

As a result, end-to-end balances and associated system of over \$ 5 trillion of mortgages are available.

What this system is about.

After the mortgage loan is given, it is sold through the mortgage of investment banks. On the other hand, investment bankers combine hundreds of thousands of mortgages as derivatives. They carry the assigned - structured bond issues. Then, the investment bankers sell these companies to investors.

After all, Antico is not interested in the quality of these mortgage packages - not even the bankers

THE OBJECTIVE is: A REDUCTION OF FREE MONEY THAT CONTRIBUTE AND MAKE HUGE PROFITS for its own owners, subsequently buying up the banks they know a priceless, and so on.

Investment banks pay rating agencies of high EA rating and receive AAA rating. This creates BALON,

The creditors do not care if they will get their money back and start giving credit.

Investment banks earn money, rating agencies are not interested - they get money from banks. And they are not interested in the quality of mortgages. In this way, banks give out more credits. In fact, hundreds of billions go through this system.

Becomes a boom of construction, Builders begin construction mass reassure without the danger that buildings will remain empty.-

Between 1996 and 2006, prices rose twice.

Companies such as Lehman Brothers and Goldman Sachs increase their assets from 30 billion to over 800 billion a year. Overall, the earnings of the EuroList are a bill of billions of dollars.

On the other hand, AIGG as the largest insurance company sells a large number of derivatives - credit swaps.

An investor who buys an EOU pays credit swaps and the money goes to AIG.

So they are insured. With derivatives, everyone can insure someone else's property.

If the value begins to fall to AI, it must recover the losses. But unlike ordinary insurances, speculators can buy swaps for papers they do not own. The right of many people to build up your property and so the losses will be as much money as possible for loss, and instead pay big bonuses to insurers involved a successful deal. Credit swaps are not adjusted. This allows AIG to not allocate money for potential losses. So the London office issues insurance.

Rating agencies earn four times more than AAA ratings for these papers. Moody's, SEP and Fitch win mills. Moody's quadrupled his profits from 2000 to 2007.

In March 2008, Bank Bear Stearns went bankrupt and Jay Morgan Chase bought it by giving two dollars a share. I.e. to the priceless. The Federal Reserve supports the deal and gives a 30 billion dollar dollar loan. Instead of taking risk mitigation measures, the Federal Reserve gives this loan,

On October 4, 2008, President Bush signed a \$ 700 billion aid bill.

The indebtedness becomes 33 to 1,

Free money is invested in construction because the rate of profit there is the highest. Real drugs and money from wars and weapons are invested in construction.

THIS BALON IS CREATED.

4.4 Analysis of the differences of the war in Iraq situation and the data of the war in Iraq

5. PRINCIPLES OF THE GLOBAL MASONIC MAFIA ELITE AND THE DEEP STATE IT CONTROLS – A BRIEF DESCRIPTION, CONCEPT, CONTENT, AND OF THE GLOBAL MASONIC ELITE CREATING, CAUSING, GENERATING ALL CRISIS ALL OVER THE WORLD IN ALL COUNTRIES

The global Masonic Mafia Elite and the deep state it controls is a corporate, militarized, functionally precisely defined, mafia-like group of people who manage and own financial, banking, corporate, IT companies, unelected by the citizens of the states, who actually manage not only a specific state, but also a group of states, on the principles of Mafia and financial banking resource technological mafia-like Materialism.

The global Masonic mafia-styled elite and the deep state ruled by it have corrupted and mafia-styled all spheres of society on which the governance of a country, of a union depends – in the case of the European Commission and the European Union, the USA, and other countries where people of the deep state rule.

All representatives of the global Masonic mafia-styled elite and the deep state are Masons and belong to various secret societies, regardless of which. For years, all secret societies have been taken over from within by the representatives and bearers of the goals and aspirations of the Illuminati for a new world genocide and dictatorship over humanity. For these Masons, the oath is to fulfill the law of the lodge and not to comply with any other laws - such as those of states, international law,

unions and others, and to do everything in the name and for the benefit of the lodge, observing only the laws of the lodge, but not the respective state, international laws, even committing crimes, helping members of the lodge when they are in trouble, and to fulfill the plan of the lodge. All laws and rules are subject to an oath to the ideology and faith in Lucifer and the church of Lucifer / Satan.

And the plan is one and only - conquest of the world, rule of the world by a world government, only by them - the global Masonic mafia elite.

Concept - Prof. Momchil Dobrev

The global Masonic mafia elite and the DEEP STATE ruled by it is an organization, structure, of management, of kleptocracy, and cryptocracy of a group of people from the financial banking, resource, technological, corporate elite of the GLOBAL MASONIC MAFIA ELITE, which works in all countries on the principles of Mafia and financial banking resource technological mafia Materialism.

Main goals and principles of FINANCIAL BANKING resource technological MAFIA-BASED MATERIALISM - THE IDEOLOGY of the DEEP STATE

The only goal is profit and the enslavement of peoples, countries, governments, the creation of monopolies, the imposition of a new world order

Participating countries - banks, financial institutions, companies - oil, resource companies, for the production of steel, oil, food, medicine, fuel - companies of the oligarchy and of the mafia.

Finance and money determine politics, wars and peace.

STEPS:

- 4) System: Financing both sides waging war against each other. In practice, the countries go into debt to the banks, then the banks and financial institutions finance the recovery of the economies of these countries. The profits are huge. The profit rate for weapons and ammunition is the highest and the fastest recoverable and turnover.
- 5) They finance the supply of weapons, ammunition, food, clothing, ammunition, additional equipment, they actually manage the process of the war – when to have an advantage for one side, when for the other.-
- 6) In reality, with the supply of weapons, ammunition, they manage the process of the war – which side should take advantage and when and for how long.

The Goal:
